Energy determines the existence of life!

- Bio-energy or life force is in the forefront of human health and body vitality which is generating the normal function of body organs.
- Loss of body biological energy is the early symptom of ailment, disruption of body energy system will directly affect body immune system, diet imbalance, accumulation of waste and toxins, thus causing premature aging and illness.

Meta Life a new source of life energy

- Meta life is mechanically hydrolyzed Oryza-E which provides high bioactive and essential ingredients from selected fractions of cereal grains grown in The Siam Valley of Thailand which is known to be the biggest and finest natural organic plantation treasure in the world.
- Meta Life is a very balanced natural source of vitamins, minerals, essential fatty acids, highly bioactive polysaccharidepeptides, and has 18 types of amino acids which helps in the production of energy and metabolic enzymes to grow new cells. At the same time, the damaged cells will be removed for living organs to function actively healthily.
- Application of Biotechnology and Nanotechnology in the production of Meta Life is to enhance the functional value by way of altering its Chemical and Molecular structure to smaller but high bioavailability of Molecular structure which allows Meta Life to be absorbed readily and utilized instantly by body cells.

Meta Life is an ideal food supplement

- Non-GMO: 100% natural food supplement
- Preservatives, binders, and additives free.
- Enhance the vitality of health, energy and enzymatic reactions of cellular level.
- Predigesting Nutrients for optimal absorption and metabolism which increasingly improves the body functions.

Ingredients

Long Grain Brown Rice          Brown Long Grain Fragrant Rice          Short Grain Brown Rice
Some benefits from Meta Life

Benefits derived from drinking Meta Life

- To enhance the production of life energy for body cells.
- To enhance the production of enzymes and secretion for the improvement of cellular metabolism.
- To improve the digestive and absorption systems.
- To improve the constant distribution of nutrients in the body.
- To regenerate and repair body cells.
- To expedite the detoxification process which help to reduce body chemical waste thus improving the immune system.
- To regulate metabolism and promote better homeostasis at cellular level.
- To prevent the development of abnormal cell.
- To promote gene reaction for the repair and development of body cells.
- To regenerate the body cells for the improvement of the stem cell.
Meta Life and Health Promoting

To manage the body cells for better health

Body cells are the basic living elements for our health. Our body consists of approximately 3 to 6 trillion of cells. Unhealthy cells will cause disorder of metabolism and disrupt the normal function of organs. The normal function of every cell in our body is possibly the most basic and essential to healthy longevity, and stay away from disease and sickness.

Three basic functions of healthy body cell

1. Cellular detoxification and cleansing – the basis to rejuvenate body cells, during the process of detoxification and cleaning, the body cells removes metabolic waste by excretion through sweat, stools, urine, mucus etc to prevent cell toxicity.
2. Food digestion and nutrient absorption – excellent digestive power easily breaks down food to become nutrients which will be absorbed by body cells, unwanted metabolic waste will be excreted to prevent toxins accumulation in cellular level. Digested nutrients will be absorbed and distributed for utilization to produce essential substances to maintain body health. Unabsorbed nutrients will be fermented and oxidized to become harmful acidic substance which will affect the body health condition.
3. Utilization of nutrient and cell rejuvenation – Nutrient that is being absorbed can be easily assimilated by body cells for constant biological energy production and anabolism which produce body fluids, enzymes, hormones etc to stabilize the internal structure of the body. It helps in the repairing and reproduction of new cell, and the stem cells thus keeping the body health condition young and energetic.

Detoxification & Excretion
- To breakdown waste from the metabolic process into urea & stools.
- To dispose of body waste and cleanse the body cells.
- To prevent toxin accumulation in cells.

Digestion of food & Absorption of Nutrient
- To breakdown food into nutrients
- To promote the absorption and utilization of glucose in order to stabilize the blood glucose
- To supply nutrient rapidly to body cells
- To reduce wastage during the metabolic and digestion process

Utilization & Rejuvenation
- The main source of biological energy production.
- High bioactive of raw material activate body cells to synthesize hormone, enzyme, hemoglobin, mucus, juices etc
- Repairing of damaged cells.
- Reproduce new and healthy cells and dispose of aging cells.
Meta Life and BEAUTY

- The main structural component of the lower layer of the skin or dermis is a protein called collagen. Collagen is responsible for the skin's strength and produced by fibroblasts in skin tissue, which are found scattered throughout the dermis.

- Collagen is a key structural component of bones, cartilage, tendons, the skin, lung tissue and blood vessels which provides structure and firmness to body tissues, and provides flexibility to those same tissues.

- Meta Life is able to stimulate skin cells in which produces collagen to delay aging process. Collagen synthesis can reduce wrinkles and improve skin texture and complexion.
Meta Life and ANTI-AGING

**Repairing Role**
- High biological energy maintains the normal functions of body cells
- High bio-active resources improve the function of repairing
- Preventing damaged cells from dying or not functioning
- Preventing cells from mutation

**Protective Role**
- Produce antioxidant enzymes to neutralize free radicals.
- Prevent cells from damaging.
- Maintain healthy and energetic cells

**Rejuvenating Role**
- Enhance the function of stem cells.
- Stimulate the production of new & healthy cells.
- Dispose of aging cells.
- Keep body cells active and energetic
Common Responses after Taking Meta Life

<table>
<thead>
<tr>
<th>Time Frame</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 seconds</td>
<td>Immediately energetic and gastrointestinal relief.</td>
</tr>
<tr>
<td>3 ~ 5 days</td>
<td>Better bowel movement.</td>
</tr>
<tr>
<td>5 ~ 7 days</td>
<td>Better sleep. More energetic during the day.</td>
</tr>
<tr>
<td>7 ~ 10 days</td>
<td>Improves appetite. Muscle relieved.</td>
</tr>
<tr>
<td>15 ~ 30 days</td>
<td>Experience temporary pain in injured area due to the repairing process by Meta Life. Tiredness may be experienced. It is advisable to drink a lot of water and take more rest.</td>
</tr>
<tr>
<td>30 days</td>
<td>Smoother skin. More energetic and better vitality.</td>
</tr>
<tr>
<td>30 ~ 60 days</td>
<td>Glucose, cholesterol, triglyceride and blood pressure levels normalized, reducing the risk of heart diseases and stroke. Blood glucose normalized in combination with medication and proper diet. More energetic. Improved skin structure.</td>
</tr>
<tr>
<td>60 ~ 180 days</td>
<td>Symptoms for chronic diseases subsided but it is advisable to follow the doctor and nutritionists’ advice. Take Meta Life as food supplement along with prescribed medication and proper diet management as help to speed up the recovery process.</td>
</tr>

Endorsement by Expert

**Dr. Mohamed Ishak**

The Missing Link to Radiant Health

“Metabolic enzymes are involved in every process of the body. Life could not exist without them. Young adults have high value of enzyme reserve in their tissues. In chronic diseases the enzyme content in the blood is lower.

The body has to replace enzymes from within itself, stealing enzymes from all parts of the body, which in the end causes exhaustion, premature aging and low energy system.

There is a definite correlation between the amount of enzymes an individual possesses and the amount of energy they have.

Meta Life increases the energy level of the cell by providing essential ingredients for production of energy and metabolic enzymes.”

**Dr. Mohamed Ishak**

Director of Dr. Ishak’s Center for Healthy Living
President of Naturopathy and Complementary Medicine Society of Malaysia

**Dr. Mark Smith Ph.D., N.D.**

President & Chairman of the Board (University of Natural Medicine)

“All scientific research today in the area of human nutrition is focused on cellular nutrition, being as it is the source of our energy. Meta Life is one of the rare products on earth that genuinely provides the essential raw materials for the cells to produce the energy necessary for every bodily process and mental function. With our foods being so devitalized and enzyme deficient, as well as all the environmental toxins that we are continuously being subjected to, we need the proper nutritional elements or “cell food” to provide all the cellular energy we can create.

I have not seen any other products in 25 years of integrated medical practice that comes close to Meta Life in terms of instantly enhanced energy and as an anti-aging cellular food.”
Dr. Bill Akpinar

“It was the extensive research MACROFOOD Company has put into their functional foods that led me to become one of their medical advisory board members.”

Dr. Bill Akpinar
Medical Director of the United States Karate Team
Medical Director of the University Natural Medicine

Dr. Somchai Boonchuen

Energy determines the existence of life. Low energy and inconsistent energy source in living organisms are the major cause of abnormality in the body. Meta Life has the essential components providing consistent energy source to the body in order to create new cells, to maintain cells and to eliminate deteriorated and dead cells, resulting in the ideal environment for living organs to live and flourish. Meta Life is what you need for the life of your cells.

Dr. Somchai Boonchuen
Research & Development Director of Macro Food tech Co. Ltd

Suitable For All Ages

For Infants & Children
- Promotes muscles tone & bone development.
- Strengthens brain cells
- Strengthens lung cells
- Reduces gastro-intestinal problems.

For Adults
- Nourishes and smoothes the skin
- Increase energy & mental alertness
- Regulates hormonal secretions
- Improves sexual health

For the Elderly
- Improves memory
- Increase energy levels
- Strengthens the immune system
- Improves muscle tone & lightens pigmentation.
For the Sick
- Increase energy levels
- Shortens recovery period
- Strengthens the immune system.

Recommended Intake
Sprinkle a scoop (3 grams) onto water and drink, liquid food or soup, then stir and drink freshly. Alternatively, simply add Meta Life to your tea or coffee or any other hot drinks or liquid food.

Storage
Store in dark, cool and dry place

Scientific Research and Development
